

OTC At-Home COVID-19 Test OptumRx Guidance

Many AultCare members are now able to purchase over-the-counter (OTC) at-home COVID-19 tests, at little or no cost. To help you better understand the benefit — including where to find at-home tests and how to submit for reimbursement — review the information below:

- Beginning Jan. 15, 2022, AultCare will cover most individual and employer group health plan members' FDA-authorized OTC at-home COVID-19 diagnostic tests purchased on or after Jan. 15, 2022, without a doctor's prescription. This OTC at-home COVID-19 test benefit includes up to 8 tests per member every 30 days.
 - Please contact your Primary Care Physician for testing options.
 - Starting Jan. 19, 2022, members may go to [COVIDtests.gov](https://www.covidtests.gov) to obtain up to 4 free tests per household.
- If AultCare does not administer your pharmacy benefit, you need to check with your Pharmacy Benefit Manager (PBM) on how to obtain or receive reimbursement for these testing kits.

If you are an AultCare individual and employer group health plan member and OptumRx is your PBM (the OptumRx logo is displayed on your member ID card) you can now receive an OTC at-home COVID-19 test at no cost from our preferred pharmacies (Kinney Drugs, Sam's Club, Walgreens, or Walmart).

To receive your COVID test at no upfront cost:

- Visit a Kinney Drugs, Sam's Club, Walgreens, or Walmart. Present your member ID card at the pharmacy counter.

Members may also order at-home COVID-19 tests online through the Optum Store for a \$0 copay.

- Visit www.optumrx.com
- Sign into your online member account
- Go to the 'Get at-home COVID-19 test with \$0 copay' and click the '**Order Now**' link.
 - If you are viewing the website on a mobile device, you may need to scroll down to find this information.

To receive reimbursement for an FDA approved OTC at-home COVID-19 test not purchased at a preferred pharmacy:

- Submit a request for reimbursement through the Claims Form at aultcare.com/notices/covid-19-information/
 - Maximum reimbursement of \$12 per test.
 - Many COVID-19 tests are sold as a 2-pack kit (\$12 for each test) and would be reimbursed at a maximum of \$24 per kit.
 - Be sure to retain your receipt and outer package to submit with your request.

The below FDA-authorized OTC at-home COVID-19 diagnostic tests covered for this benefit are below
(list will be updated regularly):
