

OptumRx® Vigilant Drug Program™

High-cost generics strategy

Effective January 1, 2022

The vigilant drug program helps you manage your pharmacy benefits with greater precision by giving you the flexibility to choose whether to limit access to certain categories of drugs, including new ones whose clinical and financial value are not yet fully established.

This approach takes medication quality and affordability to the next level.

High-cost generics strategy* — Excludes higher-cost generic products when a lower-cost generic equivalent becomes available.

*Programs are also available for clients who prefer prior authorization rather than an exclusion strategy.

| Drug Name |
