

In response to the Women's Preventive Services Act, certain birth control medications will be covered at a zero (\$0) copayment. Some medications may require specific criteria to be met as listed below.

In the event a member requests coverage for a birth control product not on the standard coverage list below, AultCare will cover that recommended drug or product at no cost to you through our exceptions process, Healthcare Reform Copay Waiver Review. To obtain approval, the member must have tried and failed at least 1 preferred product found on the preventive drug list or have clinical reason why the patient cannot take one of the products on the preventive drug list. If approved for the copayment waiver, the medication or item will be covered at 100%. If not approved for the copayment waiver, the medication or item will be subject to your plan's cost sharing. If it is confirmed the product is used for contraception and is medically necessary, a copay waiver (\$0 copay) will be automatically applied.

STANDARD COVERED PRODUCTS:

Birth Control Caps & Diaphragms

- Caya
- Femcap
- Omniflex
- Wide Seal
