

Marketplace Step Therapy Program

Step Therapy requires you to have tried a Step 1 medication from the same therapeutic class as the brand name drug within the previous 180 days. If your prescription history does not indicate that a Step 1 medication was tried, the brand name medication will not be covered. The Step Therapy Program does not apply to you if you are already taking the brand name medication. Please note that the brand name medication will be covered at the appropriate benefit level once a Step 1 medication has been tried and found to be ineffective.

The chart below lists the medications included in the Step Therapy Program:

Step 2 Medications	Step 1 Medications	Criteria
Allergy-Asthma
