

Optum Rx[®] Vigilant Drug Program

High-cost generics strategy

Effective Jan. 1, 2024

The Vigilant Drug Program helps you manage your pharmacy benefits with greater precision by giving you the flexibility to choose whether to limit access to certain categories of drugs, including new ones whose clinical and financial value are not yet fully established.

This approach takes medication quality and affordability to the next level.

High-cost generics strategy* – Excludes generic drugs that are priced substantially higher than other generics in the same class.

*Programs are also available for clients who prefer prior authorization rather than an exclusion strategy.
