

# ONCOLOGY SPLIT FILL PROGRAM

Starting a new specialty medication can be challenging. Some patients may have trouble tolerating these drugs, leading to early discontinuation or changes in dosage. To help reduce medication waste and lower out-of-pocket costs, AultCare offers an Oncology Split Fill Program for select specialty oncology medications with some plans.

If you're new to a qualifying medication - or haven't used it in the past 120 days - you may receive smaller, partial prescription fills for up to three months. This gives you a chance to try the medication and see how it works for you while paying a prorated copay (a portion of your usual copay or coinsurance).

## How the Program Works:

- The program applies to a specific list of medications, monitored regularly using clinical guidelines. See below for the list of medications.
- You'll receive a partial fill and pay a reduced cost based on the amount of medication dispensed.
- If you tolerate the medication well after 90 days, you'll begin receiving full 30-day supplies, and your regular cost share will apply.

### Please note:

- Your exact costs depend on your pharmacy benefit plan.

## Oncology Split Fill Medication List

Abiraterone	Calquence	Gomekli	Lenvima	Retevmo	Talzenna	Voranigo
Abirtega	Cometriq	Iclusig	Lorbrena	Revuforj	Tarceva	Votrient
