

Optum Rx[®] Vigilant Drug Program

Clinical duplicates strategy

Effective July 1, 2025

The Vigilant Drug Program helps you manage your pharmacy benefits with greater precision by giving you the flexibility to choose whether to limit access to certain categories of drugs, including new ones whose clinical and financial value are not yet fully established.

This approach takes medication quality and affordability to the next level.

Clinical duplicates strategy* – Excludes medications with no clinical advantage over similar medications and possible generic options.

In this document, brand-name medications are shown in UPPERCASE (for example, CLOBEX). Generic medications are shown in lowercase (for example, clobetasol).

*Programs are also available for clients who prefer prior authorization rather than an exclusion strategy.

Drug Name
ABILIFY MYCITE MAINTENANCE KIT
ABILIFY MYCITE STARTER KIT
ABRILADA (1 PEN)
ABRILADA (2 PEN)
ABRILADA (2 SYRINGE)
ACTOS
ACUVAIL
acyclovir external cream
