Your Health Plan Provides Preventive Care Benefits

Every family member you have covered with your AultCare health plan has preventive care coverage available to them. This covers your preventive care exam and any appropriate preventive diagnostic testing recommended by your doctor in accordance with the United States Preventive Task Force guidelines.

These benefits are covered at 100% if provided by a network provider. Check your plan document for more information to ensure you receive the recommended evaluation in an appropriate location.

You can view a complete list of the covered services at the Task Force's website at www.uspreventiveservicestaskforce.org/uspstf/uspsabrecs.htm

Contact the AultCare service center for answers to specific questions or for additional help at 330 -363-6360 or 1-800-344-8858.

Consult with your doctor about which tests are right for you.
