

Population Health Management

AultCare's Population Health Management (PHM) program focuses on providing patient-centered, accessible, comprehensive, and coordinated care. A recent statistical analysis concluded that AultCare members of a PHM office typically have higher quality outcomes.*

The PHM team of registered nurses are available on-site at many Primary Care Provider offices and serve as the link between members, providers, and the health plan. They provide guidance on appropriate utilization of services and assistance with navigation of the healthcare system.

PHM services are provided at no additional cost to AultCare members.

**All statistics provided by AultCare data reporting.*

Telephonic and In Person Support

Members are encouraged to connect with their PHM nurse via telephone or in person to ask questions and receive support.

Educational Materials and Resources

Education is offered to members dealing with chronic and acute conditions along with additional information and resources to ensure members' needs are met.

Preventive Screenings

PHM nurses work closely with members to ensure compliance with age and gender appropriate preventive screenings.

Maximize Plan Advantages

Our team can help members maximize their health plan advantages to receive high quality, affordable care.
