

Diabetes Telemonitoring Program

About the Program

If you are an AultCare member and have been diagnosed with diabetes, AultCare's diabetes telemonitoring program is available to you at no additional cost.

By participating in this program, telemonitoring equipment will be used to report your blood glucose level and sends your results to your assigned registered nurse. The nurse will monitor your results to watch for trends or potential risks.

Throughout this program your results are monitored and specific trends can be identified. The data can be shared with your physicians as needed or on your appointment days for records of your data. Educational materials are also available to help you understand all aspects of your condition.

Professional Support

In this program, you are assigned a registered nurse who will closely monitor your diabetes through use of your equipment. Your nurse will provide support and answer questions you have regarding your condition.

At Home Monitoring

You can use equipment to monitor your diabetes from the comfort of your home.

Educational Materials and Resources

We have educational materials and resources available to provide you with the information you need for quality care.

Learn More

If you are interested in this program, please contact us and ask to speak with a nurse about our diabetes program.

You have the right to assistance and information in your language at no cost. To speak with an interpreter, call 330-363-6360 (TTY 711).
