

Heart Failure Telemonitoring Program

About the Program

If you are an AultCare member and have been diagnosed with heart failure, AultCare's heart failure telemonitoring program is available to you at no additional cost.

By participating in this program, an easy-to-use weight scale will be sent directly to your home with set up instructions. The scale collects your weight and sends it your assigned registered nurse to monitor signs of complications due to heart failure.

Throughout this program, your weight and symptoms are monitored and specific trends can be identified. The data can be shared with your physicians as needed or on your appointment days for records of your data. Educational materials are also available to help you understand all aspects of your condition.

Professional Support

In this program, you are assigned a registered nurse who will closely monitor your health through use of your equipment. Your nurse will provide support and answer questions you have regarding your condition.

At Home Monitoring

You will be provided with equipment to monitor your condition from the comfort of your home.

Educational Materials and Resources

We have educational materials and resources available to provide you with the information you need for quality care.
